hancy_explantion - Hancybox (@Hancybox)

Listed 79 of 123 channel videos (cap requested 1000). Channel reports 123 videos; the Shorts tab first render page yields 48 shorts and the Videos tab 31+1 long-form entries. Remaining uploads sit behind YouTube infinite-scroll/JS and are unreachable from this sandbox (no frames, no scroll). Nothing beyond these is invented: every row below is either rewatched on a saved contact sheet, fetched as a per-video metadata page, or read off the channel listing. Video frames/audio cannot be downloaded here (YouTube 401 wall). "Alight Motion tools" columns are: observed on saved contact sheets for the 20 rewatched shorts; confirmed by each short's own description/metadata where fetched; otherwise mapped from the video's own title/tags (his titles name the technique) and labelled by evidence column.
